Faculty Spotlight

In the Center for Information and Cyber Security, Ram Dantu leads research teams focused on blockchain applications, AI for security, network security, IoT security and Quantum Networks.

Students who work with Mark Thompson will dive into network security and cybersecurity education, with opportunities to explore computer forensics, cyber intelligence, and quantum communications.

Students who work with Kirill Morozov will explore next-generation cryptographic systems and their applications to secure cloud computing and data privacy.

Admission

Our undergraduate programs are open to high-achieving students interested in pursuing degrees in computer science and engineering. Admission to the College of Engineering is contingent on clear admission to the university.

Successful applicants to our programs should apply through www.applytexas.org.

View [additional requirements and apply](#) as a freshman, transfer, or international student.

Funding Opportunities

Students seeking financial assistance are encouraged to fill out the Free Application for Federal Student Aid (FAFSA) each year. Students may also find assistance with locating career openings, student employment, internships and financial assistance through the Career Center and Student Financial Aid and Scholarships Office.

Scholarships are available to undergraduate students as well, though application deadlines fluctuate. The Department of Computer Science and Engineering also offers scholarships to qualified students throughout the year. [Apply and learn more](#).
